

Md. Mohaiminul Islam

Front-End Developer | [LinkedIn Profile](#) | [GitHub Profile](#)

Email - mohaiminulislam321@gmail.com | +8801850867586 | Gazipur, Bangladesh

Skills

Expertise: JavaScript | HTML | CSS | React

Comfortable: Express.js | REST API | GitHub

Familiar: MongoDB

Projects

1. Project name: **Harlem Heartstrings** [Live Site](#) | [GitHub](#)

Harlem Heartstrings is an online platform offering violin classes by top instructors to students.

- Employed user registration and login features, role based dashboards.
- Designed an admin dashboard to manage classes, review instructor submissions, and control user roles.
- Integrated a payment system for students to book classes, updating available seats.

Technologies: React, Tailwind CSS, Firebase authentication, Express.js, JWT, MongoDB, Stripe payment

2. Project name: **Toy Nirvana** [Live Site](#) | [GitHub](#)

An online toy marketplace for users to see and manage toy collections with CRUD functionality and user authentication.

- Implemented user authentication and private routes, allowing users to add, view, update or delete their own toys.
- Added searching and sort functionalities for toys.
- Single page application model to ensure seamless user experience.

Technologies: React, Tailwind CSS, Firebase authentication, Express.js, MongoDB

3. Project name: **Chow Eateries** [Live Site](#) | [GitHub](#)

A responsive React app for exploring recipes from top chefs, with user authentication, favorite recipes functionality and a blog page with a downloadable PDF.

- Includes a list of top chefs in Indonesia, their profiles, and their recipes.
- Features authentication using Email and Password, Google and GitHub.
- Enabled users to mark recipes as favorites, displaying a toast message.

Technologies: React, Tailwind CSS, Firebase authentication, Express.js

Education

Rajendrapur Cantonment Public College
High School Diploma, Science (Aug 2015)
